EDUCATION

CMR University

- B.Tech CSE (2024-2028)
- Current CGPA: 8.66 (Semesters 1-4)

TECHNICAL SKILLS

- Python (DSA)
- JavaScript (ES6+)
- Data Structures & Algorithms
- React.js, Redux Toolkit
- MongoDB (Aggregations)
- HTML5, CSS3, Tailwind
- Git & GitHub
- Cloudinary
- VS Code, Neovim

PROJECTS

NivikaGifts.in | MERN Stack, Redux, Cloudinary | Jan 2026

- Engineered a scalable multi-vendor architecture featuring a custom "Split-Order" system, enabling a unified checkout experience while maintaining distinct processing pipelines for individual vendors.

Shadow Bag | IoT, C++, ESP32, Arduino | Oct 2025

- Prototyped an autonomous smart luggage system capable of obstacle avoidance and smartphone-controlled navigation.
- Programmed ESP32 and Arduino microcontrollers to process real-time sensor data and control motor drivers for precise movement.

ForgeModel | August 2026

- Current AI marketplaces have a critical trust deficit: model performance is often backed by subjective human vibes or biased "LLM-as-a-Judge" ratings. Businesses waste time and resources deploying models that break in production. Forge is a transparent, developer-first AI Model Marketplace & Evaluation Engine powered by 100% deterministic ground-truth verification (inspired by the LiveBench methodology).

CODING PLATFORM

LeetCode | Problem Solving

- Maintain a consistent 250+ Day Active Streak, solving complex Data Structure & Algorithm problems in Python.
- Created and distributed a comprehensive "DSA Patterns Guide" covering 16 topics and 93 patterns to help peers master algorithmic interviews.

AWARDS & ACHIEVEMENTS

- 2nd Runner up in Codefury 9.0
- won 2nd prize at prajanotsava of ui/ux Redesign
- 300+ problems on leetcode and 50+ on codeforces

HACKATHONS

- CodeFury-9.0 And codefury 8.0 by the IEEE UVCE
- Buildathon by Tutedude - Developed "TeamFlow," a collaborative workflow tool
- Cmru Hackathon
